

### Tokio Marine Group won Japan Resilience Award 2018 for its various initiatives

We proudly announce that initiatives of “Regional Revitalization” by Tokio Marine & Nichido Fire Insurance Co., Ltd. (President: Toshifumi Kitazawa, hereinafter “TMNF”) and Tokio Marine & Nichido Risk Consulting Co., Ltd. (President: Taizo Shimakura hereinafter “TRC”) won “Best Resilience Award” respectively at the Japan Resilience Award 2018(\*). Also, initiatives of “Health and Productivity Management” and “Building a disaster-resilient society in collaboration with Tohoku University” won “Excellent Resilience Award.”

(\* ) “Japan Resilience Award” is an award hosted by Association for Resilience Japan, which seeks, evaluates and prizes corporations and/or organizations conducting distinguishing initiatives to create resilient country, communities, people and businesses for building resilient society for the future generation.

#### 【Award-winning initiatives】

Initiative/Award	Content
TMNF and TRC’s Support for local resilience improvement through promotion of regional revitalization / Best Resilience Award	Initiatives for regional revitalization directly linked to local resilience improvement. TMNF established the Division of Regional Revitalization in July 2016 which consists of 150 members to promote regional resilience improvement through following activities: "BCP planning support program for small to medium-sized companies", "Conducting lessons such as 'Disaster Prevention Lesson' to school children", "Hosting region-specific 'Marche' to promote the areas" and so on.
TMNF’s Support for regional resilience improvement through promotion of Health and Productivity Management /Excellent Resilience Award	TMNF established "Health and Productivity Management Task Force" in January 2017 to actively promote the dissemination of "Health and Productivity Management" by cooperating with local government and branch offices of Japan Health Insurance Association, collaborative research with the University of Tokyo and practice within the group, improvement of health literacy among the group companies, active utilization of the leaflet to enhance awareness, and providing products and services.
TMNF’s Building a disaster-resilient society through the industry-academia collaboration with Tohoku University / Excellent Resilience Award	TMNF formed an industry-academia collaborative agreement with Tohoku University in July 2011, and has been promoting earthquake-induced tsunami risk research, tsunami evacuation research and disaster -prevention awareness activities by incorporating Tohoku University's power of disaster science and Tokio Marine & Nichido’s insurance knowledge and expertise. The research results have been widely disseminated through international and academic conferences and multi-stakeholder discussions in Japan and overseas.

We will be contributing to create a society resilient through efforts such as “Regional Revitalization”, “Health and Productivity Management” and “Industry-academia collaboration” by utilizing the

knowledge cultivated through our insurance business and cooperating with various stakeholders.
